CPCS A40 Slinger Signaller Training

Course Overview

This training course is for the CPCS A40a (all duties) Slinger Signaller roles in the construction industry. The course provides personnel, who have limited experience of the slinger role and with the basic knowledge of activities associated with the role and the safety and regulatory requirements of those activities. The aim and objectives of the CPCS A40a (all duties) Slinger Training are to provide personnel with knowledge of the lifting principles and safe use of lifting accessories, to understand and recognise general hazards and risks of lifting operations also awareness of legislation and regulation.

Course structure

The course is a mix of theory and practical training. Delegates are evaluated by means of an assessment throughout the duration of the course which leads to a CPCS A40a theoretical & practical technical test, the delegate must pass the theoretical test to enable them to carry out the practical test.

Please note: The CPCS Technical (theory) test questions are available to review prior to attending the course and can be downloaded online at NOCN job cards revision documents slinger signaller A40.

Q & A

What practical exercises will I be asked to complete?

Pre-& post lifting checks / pre-& post lifting accessory inspections/ lifting and transfer loads safely and efficiently, which will include the following areas: Identifying lifting accessories to be used for a given task, slinging techniques, signalling utilising hand signals and audible instructions to a crane operator via handheld radios.

What qualification will I gain from this course?

CPCS red card trained operator for A40a Slinger Signaller on passing the technical test.

What is the course duration?

3 Days training & 1 day's CPCS theoretical & practical technical test.

Will I have to take an assessment?

All delegates will be assessed over the duration of the CPCS A40 (all duties) a slinger signaller course by the instructors to help identify if there are any areas the delegate may need assistance in to ensure the learning outcomes are achieved before taking the CPCS theoretical & practical technical test.
