Sustainability

Made from natural vegetable fats, oils and waste bi-products via a process that uses hydrogen instead of methane, Green D+ burns even cleaner than regular bio-diesel and drastically reduces engine emissions.

Our partnership represents our commitment to reduce greenhouse gas emissions, and to improve air quality through the use of more sustainable construction plant and equipment.

A partnership between Select Plant Hire and PUNCH Flybrid to transform the way generators are utilised on construction sites across the country. The PUNCH Flybrid energy storage flywheel delivered a 50% fuel saving and stopped 3,400kg of CO² being released into the atmosphere over four weeks during the operation of one crane, according to Select Plant Hire.

Following the Government's 10-point plan for a Green Industrial Revolution, CO₂nstructZero is the construction sector's response, setting out how the industry can collectively meet Net Zero by 2050. The Climate Change Committee's 6th Carbon budget has established the priorities for this action plan.
